

Statement

April 7th, 2014
Poitiers/Bagnolet

Ref: TRON- VHF/Air battery module X93002

The battery module X93002 is made of a 2s1p LSH14 battery pack – ref. X80242 also assembled by Jotron.

We hereby certify that the power source 2s1p LSH14 – referenced X80242, assembled by Jotron from two C-sized LSH14 cells in series (configuration known as 2s1p), contains 3,6 g of lithium metal.

A battery model with the same LSH14 component cells and same 2s1p electrical configuration has been already constructed by Saft-SBG (Ref.04283H) and tested by Saft-SBG and compliant with the current applicable *"Recommendations on the Transport of Dangerous Goods, part III, sub-section 38.3, Manual of Tests and Criteria"* issued by the United Nations Committee of Experts on the Transportation of Dangerous Goods.

It is the Pack Maker responsibility to comply with the applicable transportation regulations.

The information contained in this document does not imply implicit or specific warranty that the inspected battery model complies with the applicable transportation regulations.
