

JOTRON COMPANY PROFILE

JOTRON

YOUR COMMUNICATION PARTNER

www.jotron.com

“We steadily work on developing new markets for our core business and simultaneously develop new products that satisfy new requirements and specifications. Our vision is as clear as it is ambitious: To be a world leader.”

– Merete Berdal, Managing Director

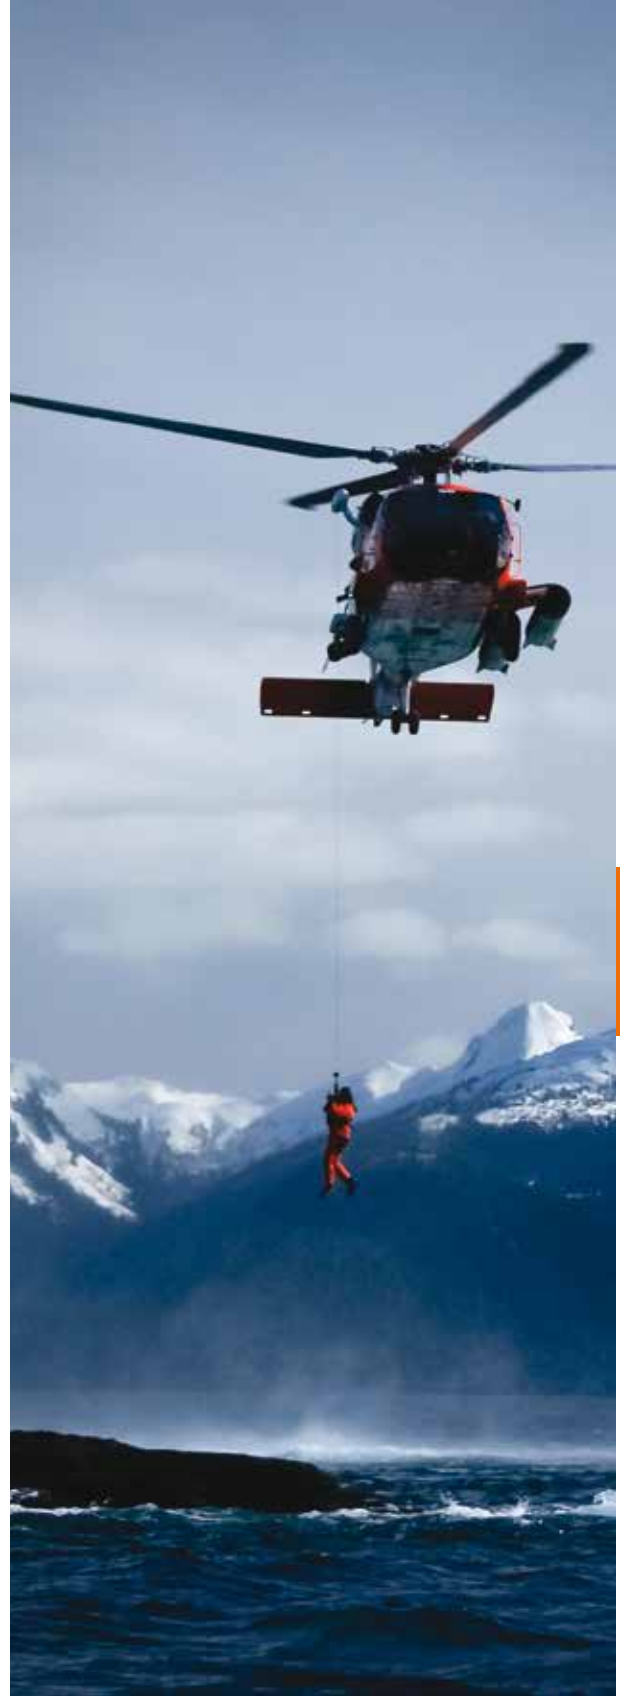

Jotron has offices in Norway, Singapore, the United Kingdom and the United States, in addition to a representative office for the ATC market in China and a production facility in Lithuania. These offices ensure close communication with the market in their respective regions and offer local, prompt and easy access to Jotron products.

Jotron products are also sold and serviced through international representatives. Trained and qualified personnel in companies worldwide offer first class service for all Jotron products.

Through dedicated service, reliable performance and quality products, Jotron has established long-lasting customer relations. The company has been developed “stone by stone”, thereby creating lasting product value for the industry and ultimately all customers for over 50 years.

The company headquarters is located in the city of Larvik, 130 km south of Oslo. Jotron has evolved from a small company located only in Vestfold, Norway to being located on three continents of the globe.

Jotron was incorporated in 1967 and only three years later produced the world’s first Emergency Position Indicating Radio Beacon (EPIRB), which was released in 1970.

Today, Jotron is regarded as a world leading supplier of high performance safety communication equipment. Jotron communication technology is used all over the world and more recently over an increasing number of markets.

The products

Jotron develops and manufactures professional products and communication systems for usage in air, on land and at sea. The company supplies high quality products and services that comply with all the latest applicable standards.

Delivering critical communication products to some of the harshest environments means Jotron strives to enhance safety communication by offering state-of-the-art products and solutions.

Meeting the market requirements

New markets have been researched and captured. In Jotron tradition, the search continues for the development of leading products using the most advanced technologies.

Research and development are fundamental elements to achieving successful products and solutions that meet the demands of an international market.

YOUR COMMUNICATION PARTNER

Producing high performance equipment made for use in severe conditions or emergency situations requires a highly qualified team of individuals.

In addition, Jotron uses the most modern test instrumentation and detailed test procedures ensuring top notch quality. Continual product and solution updates using leading edge technology help keep Jotron a market leader.

The product portfolio is strong and has developed and matured over the years. Manufacturing has of course increased greatly following growth.

Jotron has dedicated, experienced and highly qualified teams of engineers and product developers. All departments work closely with each other in an effort to meet market demands.

Jotron focuses on delivering not only the best quality products and solutions, but also offering the best quality customer support, which is key in maintaining good customer and partner relationships.
