

Jotron

Company profile

We work steadily on developing new products that satisfy new requirements and specifications, while simultaneously keeping focus on growing our core business prospects.

Our vision is as clear as it is ambitious:

- To be a world leader.

– Merete Berdal, Managing Director

Safety since 1967

300 employees on three continents

Jotron has offices in Norway, Singapore, the United Kingdom and the United States, in addition to a representative office for the ATC market in China and a production facility in Lithuania. These offices ensure close communication with the markets in their respective regions and offer local, prompt and easy access to Jotron products.

The company headquarters is located in the city of Larvik, 130 km south of Oslo. Jotron has evolved from a small company located in Norway to now being a global company represented in three continents.

Jotron products are also sold and serviced through international representatives. Trained and qualified personnel in companies worldwide offer first class service for all Jotron products.

History

Through dedicated service, reliable performance and quality products, Jotron has established many long-lasting customer relationships. Jotron was developed “stone by stone”, thereby creating lasting product value for the industry and ultimately all customers for over 50 years.

Jotron was incorporated in 1967 and only three years later produced the world’s first Emergency Position Indicating Radio Beacon (EPIRB), which was released in 1970.

Jotron today

Today, Jotron is regarded as a world leading supplier of high performance safety communication equipment. Jotron products are used all over the world and more recently into new and exciting markets.

The products

Jotron develops and manufactures professional products and communication systems for use in air, on land and at sea. Jotron supplies top of the range products and solutions that comply with the latest standards. Jotron operates with modern test instrumentation and detailed test procedures ensuring the best possible quality.

Jotron has a strong and mature product portfolio. Delivering critical communication products that must work effectively in the harshest environments is a crucial factor. Over the years, manufacturing and production have increased greatly.

Meeting the market requirements

New markets have been researched and captured, however, the search continues for the development of leading products using the most advanced technologies.

Research and development are fundamental elements to achieving successful products and solutions that meet the demands of an international market. Jotron has dedicated, experienced and highly qualified engineers and product developers. These departments work closely integrating ideas and technology that meet market demands.

Jotron focuses on delivering not only the best quality products and solutions, but also offering the best quality customer support, which Jotron believes is key in maintaining good customer and partner relationships.
